Specification

The specification does not include reference numerals that refer to the like numerals in the drawings so as to adequately describe the invention. Please note the drawings and specification of the patents cited herein.

Drawings

The drawings are objected to because they do not contain reference numerals (see above). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase in claim 1, "what is hereby defined as" is ambiguous.

The phrase "easily removable" is subjective. The alternative structures recited, indicated by "either" and "or", render the claims indefinite. The use of the trademark Velcro TM has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology. Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,6,7,11,12,16 and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Neer.

Neer discloses an insect screen that is removable and washable, is attached via Velcro TM, column 9, line 18, or grommets 4, has a color and a design.

Claims 13-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tollivar.

See valance, top border portion, and slit 27 with a zipper.

Claim Rejections - 35 USC § 103

Art Unit: 3634

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4,5 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neer.

The use of canvas for the valance in place of the vinyl strip reinforcement strip for top edge 2 would have been obvious so as to further reinforce the top edge.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
